PROFILE

Detail-oriented and analytical computer science graduate with hands-on experience in IT support, virtualization, and object-oriented programming. Strong in identifying and resolving technical issues, managing data securely, and building efficient, user-focused systems. Skilled in cloud platforms, cybersecurity fundamentals, and front-to-back software development, including Java, Jakarta EE, and Android app development with Jetpack Compose. Passionate about using technology to improve everyday solutions, support team goals, and drive innovation. I bring problem-solving and technical expertise to a fast-paced, growth-focused environment.
