

PROFILE

Diploma-qualified Computer Science graduate with hands-on experience developing full-stack web and mobile applications using JavaScript, React, Node.js, Java, Jakarta EE, and PostgreSQL. Skilled in RESTful APIs, object-oriented programming, Git/GitHub, Agile development, and Android development with Jetpack Compose. Passionate about building scalable, user-focused software, solving technical challenges, and contributing to collaborative engineering teams while continuously expanding my technical expertise.

Programming Languages & SKILLS

- Languages: Typescript (ES6+), HTML5, CSS3, Python, Java, PHP
- Frontend Technologies: React, Vue.js, Responsive Design, DOM, Html, CSS, Javascript, Shopify Liquid
- Backend Technologies: Java, Express, Python, Kotlin, C++, C, PHP, Nodejs, Firebase.
- Database: MySQL, PL/SQL, PostgreSQL
- Tools & Workflow: Git, Github, Gitlab, Cyber Security, Cyber threat Management, CI/CD, Agile/Scrum, VS Code, REST APIs.

EDUCATION

- **Diploma in Computer Science - Tshwane University of Technology**
- **Matric: Bachelors Certificate – Centurion College**

Certificates (25+)

- Cisco: Cyber Security IBM
- Python 101 for Data Science
- Cisco: JavaScript Essentials
- Cisco: C++ Essentials
- Cisco: Ethical Hacker
- Cisco: Cyber Threat Management
- Cisco: Network Defense
- Cisco: Data Analytics Essentials
- Cisco: Network Support and Security
- Cisco: Morden AI
- Cisco: End Point Security
- FNB: Full Stack Development
- AWS Educate Machine Learning Foundations

Professional Experience

- **MLAB - Software Developer Trainee – 1 July 2025 – 31 July**
 - Completed an immersive full-stack development program, building production-ready applications using React, Node.js, and PostgreSQL.
 - Developed a capstone project featuring user authentication, CRUD operations, and third-party API integration, deployed to a cloud hosting environment.
 - Practiced Agile methodologies, version control with Git, and collaborative coding through pair programming and peer code reviews

- **Hiteknoology Solutions - Software Developer – June 2025 – December 2025**
 - Developed Developed and maintained full-stack web applications using React and Node.js, implementing RESTful APIs and JWT authentication for secure user sessions and role-based access control.
 - Built responsive, mobile-first user interfaces with HTML5, CSS3, and JavaScript, ensuring cross-browser compatibility and improving mobile user retention.
 - Collaborated with cross-functional teams in an Agile/Scrum environment, delivering features across 2-week sprints through daily stand-ups, sprint planning, and peer code reviews.
 - Optimized PostgreSQL database queries and front-end asset delivery, reducing average page load time and improving overall application performance.
 - Managed source control and deployment workflows using Git/GitHub and CI/CD pipelines, maintaining clean commit history and stable production releases.

- **Burtronix - Software Developer – January 2026 – Present**
 - Contribute to the development and maintenance of Drupal-based websites, working across site configuration, content modelling, theming, and backend functionality.
 - Build and update structured content types, fields, views, entity references, and automated labels to improve content management workflows and reduce duplicated data.
 - Work with Drupal configuration management, Composer dependencies, Drush commands, and Git-based workflows to deliver reliable site updates across local and shared environments.
 - Support debugging and issue resolution across frontend, backend, and configuration layers, including layout fixes, content display problems, file handling, and environment-related issues.
 - Collaborate on GitLab/GitHub-based development workflows, reviewing issues, creating focused updates, testing changes locally, and pushing clean commits for deployment.
 - Assist with improving local development tooling and project setup, including domain configuration, service lifecycle scripts, and documentation for smoother developer onboarding.
